

IMMUNE RISK ASSESSMENT REPORT

Document ID: #89563443-000362
Classification: PREVIEW MODE

Executive Summary:

This report provides a two-layer AI-driven evaluation of the astronaut's immune system resilience under spaceflight conditions. The predictive model analyzes pre-flight physiological readiness (Earth Model) and in-flight biomolecular shifts (In-Flight Model) to prevent severe immune dysfunction before clinical symptoms manifest.

Biomarker	Baseline	In-Flight Shift	Risk Analysis
IL-6 (Interleukin-6)			
NLR (Neutrophil-to-Lymphocyte Ratio)			
Cortisol			
EBV Load (Epstein-Barr Virus)			

ACCESS RESTRICTED PREVIEW ENDS HERE
